

# versis

Isolate yourself. Be in and out of the lounge. Divide the space. Thin plywood arms of Versis, is designed to reduce the bulk of the height. Tubular arm-like bended metal bases is not only helping the arms for bulk reduction, but also let the floor easily cleaned considering the size of the sofa. The inner space of the sofa helps travellers who always need meetings in public settings.

The design attitude of Versis is set up, right from the first brief of deberenn, as the conceptual relaxing and privacy zones in an open space. The two different heights lets you choose your privacy level. You are hidden while you can put your hands on the armrest of the sofa.
