

HF99 Fenix Bianco Alaska 0030

14112019

HF00 Fenix Nero 0720

Lage reflectiviteit, extreem mat oppervlak
Faible réflectivité, surface extrêmement mate

Geringe Lichtreflexion, extrem matte Oberfläche
Low light reflectivity, extremely mat surface

Thermische reparatie van kleine krassen.
Réparation thermique des micro-rayures

Thermische Bearbeitung von Kratzern möglich
Thermal healing of microscratches

Geen onverwijderbare vingerafdrukken
Aucune trace de doigts

Keine Fingerabdrücke
Anti-fingerprint

Aangenaam aanvoelende oppervlakte
Toucher soyeux

Weicher Touch
Soft touch

Weerstand tegen krassen en slijtage
Résistance aux rayures et à l'abrasion

Resistent gegen Kratzer und Abrieb
Resistance to scratches and abrasion

Weerstand tegen droge hitte
Résistance à la chaleur sèche

Resistent gegen trockene Hitze
Resistance to dry heat

Hoge weerstand tegen oplosmiddelen en huishoudelijke reinigingsmiddelen
Grande résistance aux solvants et nettoyants ménagers

Resistent gegen säurehaltige und alle haushaltsüblichen Reiniger
High resistance to acid solvents and household reagents

Verbeterde antibacteriële eigenschappen
Propriétés antibactériennes renforcées

Verbesserte antibakterielle Eigenschaften
Enhanced anti-bacterial properties

ORDINARY MAINTENANCE : FENIX NTM urface should be cleaned regularly but does not require any special maintenance, just a damp cloth with warm water or mild detergents. Almost all normal household cleaning products or disinfectants are perfectly well tolerated. It is suggested to use a melamine foam sponge - also known as magic sponge - for the normal cleaning and maintenance of the surface.

EXTRAORDINARY MAINTENANCE : In case of dirt which cannot be cleaned with normal household detergents, due to the irregular topography and closed surface of FENIX NTM, the use of non-aggressive aromatic solvents (acetone) is suggested. In case of micro scratches, please refer to the specific surface thermal healing instructions

by iron

or by foam sponge.

DAILY MAINTENANCE TIPS : The everyday use of a melamin foam is recommended for the proper regeneration of the material.
